Burnett gave an update on 2013 cases 67 and 72, and 2014 case 02. On Case 67, the officer was assisting in extricating someone from a car. The officer used the tool to break the glass and in the process hit his finger on the frame of the window. On Case 72, the injury took place while the officer was preparing for a team building exercise. The officers participating in this exercise were being paid at the time the injury took place. On Case 14-02, the employee was injured while dislodging bags on a carousel. The carousel does not work properly and will only move in one direction. This causes the bags to get caught up. Burnett reported that heavy duty piping can be purchased with Inmate Welfare Funds and stationary racks can be constructed to hang the bags from.

There was no public comment.

A motion to adjourn was made by Burnett and seconded by Schackmann. The meeting was adjourned.
