Introduction

This report lists all surface transportation projects in Sangamon County receiving Federal funds during the 2012 fiscal year. Projects which have been listed in the Springfield Area Transportation Study (SATS) Transportation Improvement Program include a TIP project number. A listing of federal obligations for projects located outside of the MPA is also included.

All references to project descriptions, bicycle and pedestrian accommodations, and project phases of work were obtained from SATS TIP documents and from the 2035 Long-Range Transportation Plan. Federal highway funding obligation data for FY 2012 and federal funding sources were obtained from the Federal Highway Administration FMIS report for Sangamon County. Federal transit funding obligation data was provided by the Springfield Mass Transit District.

For some projects, the federal funding obligation listed in the FMIS report exceeded the amount of federal funds reported in the SATS TIP. In these cases, a column was included in the Project Listings table to show the difference between the two totals.

Some projects in the Project Listings have been assigned a map number and have been included in a map at the end of this document. Projects in the table that were not assigned map numbers involve multiple projects dispersed throughout the SATS Metropolitan Planning Area (MPA) and thus were not mapped.
