

## **SATS COMPLETE STREETS POLICY STATEMENT**

“Complete Streets” refers to public rights-of-way that are designed and operated to provide a safe and accessible transportation network for all users, including pedestrians, bicyclists, and transit riders, regardless of age or ability. This context-sensitive approach considers all transportation projects as potential opportunities to improve safety, access, and mobility for all travelers.

The Springfield Area Transportation Study supports Complete Streets and its members will consider the following criteria when designing transportation projects as opportunity and funding permit:

- types of users of the transportation system, including pedestrians, bicyclists, transit users, motor vehicles, and freight interests;
- project surroundings in context with how the facility will be used and who will be using it to determine what accommodations will be provided; and
- service levels for all users anticipated by adopted comprehensive or systemwide plans.
