SCCDS Monthly Report presented by Director Dodson. Still down two personal. Please see the monthly report. No questions.

Department Inquiries: A Pleasant Plains firefighter witnessed a car go off the road, she calls 911 and the dispatcher asks if there are any injuries, she replies no. We then transfer to the State Police, which they immediately transfer it back to us. We then send someone and the lady that called was mad because she said there was an 8 minute delay for EMS. She was talked to and it has been resolved.

New Business: Joe mentioned that he attended a safety meeting this month and there were some issues that were brought up from the committee. 1.) Channel 1 traffic we are going to make an effort within our agencies to move non-priority traffic to channel 4. We are just asking the dispatchers be reminded again that if one of the agencies doesn't work for us or the city brings it on channel 1 and there is something going on channel 1 to move it to channel 4. 2.) We are having a problem with mobiles and portables that have incorrect user ID's. 3.) There is a concern with our deputies that channel 1 is not being staffed adequately. Joe didn't have a exact date or time but what is being reported is that channel 4 when one of the dispatchers goes on break that channel 1 happens to handle 911 calls. The request is can we make sure that when someone goes on break that we have someone just designated just for channel 1?

Old Business: None
