

Lot Configuration and Setback Requirements in Sangamon County

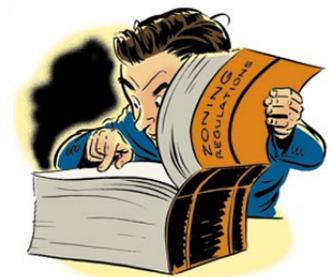

There are basic requirements that must be met when a building is constructed or a lot created. These are reviewed when a building permit application is submitted to the Sangamon County Department or a request for a land division is submitted to the Planning Commission. In all zoning districts the following standards apply:

- The depth of a lot can be no more than 2.5 times the width of the lot for all lot less than 40 acres.
- In a required rear yard (the rear 15'-30'—See "Rear Yard Setback") an accessory building can be 3' from a side or rear property line.
- Only one principal structure is allowed on a lot.
- Corner lots require a minimum of half (1/2) of the required front setback.
